

DRP-C100 Series

DIN-rail computers with Tiger Lake 11th Gen Intel® Core™ processor base model and high-interface models

Features and Benefits

- DIN-rail mountable computers with fanless design
- Intel® Celeron® or Intel® Core™ i5, or i7 processor
- Rich interface options for up to 8 serial and 10 LAN ports
- Compact size to fit most field applications
- -30 to 60°C operating temperature range

Certifications

Introduction

The DRP-C100 Series DIN-rail mountable computers are powered by an Intel® Celeron®, or Intel® Core™ i5 or i7 processor. The computers come with a rich set of interface options including up to 8 software-selectable RS-232/422/485 serial ports and up to 10 gigabit Ethernet ports. The communication interfaces are located on the front and rear sides of the product, enabling easy access and expansion for industrial applications. A dual-storage design that includes CFast and SD slots enables easy storage expansion. A unique battery-fastener cover secures the battery in place and ensures stability in all operating environments while a trap-door design for the battery slot enables easy battery swapping without having to remove the cover.

The DRP-C100 compact computers come in a fanless design and can withstand a temperature range of -30 to 60°C, making them a good fit for harsh operating environments. The built-in TPM 2.0 module secures the platform from unauthorized access. The DRP-C100 Series is an intelligent, reliable, durable, and versatile yet user-friendly computing solution that fulfills both OT and IT requirements of industrial environments.
