

ioLogik 2500 Series

Smart Ethernet remote I/O with Click&Go Plus Logic

Features and Benefits

- Front-end intelligence with Click&Go Plus control logic, up to 48 rules
- Active communication with MX-AOPC UA Server
- Automatically complement disconnection period data with MX-AOPC UA Logger software
- 4-port unmanaged switch built in for linking to Ethernet devices
- I/O expansion port for daisy chaining up to 8 ioLogik E1200 units
- 3-in-1 serial port: RS-232, RS-422, or RS-485
- Supports SNMP v1/v2c/v3
- Simplifies I/O management with MXIO library for Windows or Linux
- Wide operating temperature models available for -40 to 75°C (-40 to 167°F) environments

Introduction

ioLogik 2500 smart Ethernet remote I/O devices feature unique hardware and software designs, making them ideal solutions for a variety of industrial data acquisition applications. The ioLogik 2500's hardware design includes a 4-port unmanaged Ethernet switch and 2 serial ports, enabling it to seamlessly connect to a variety of field devices.

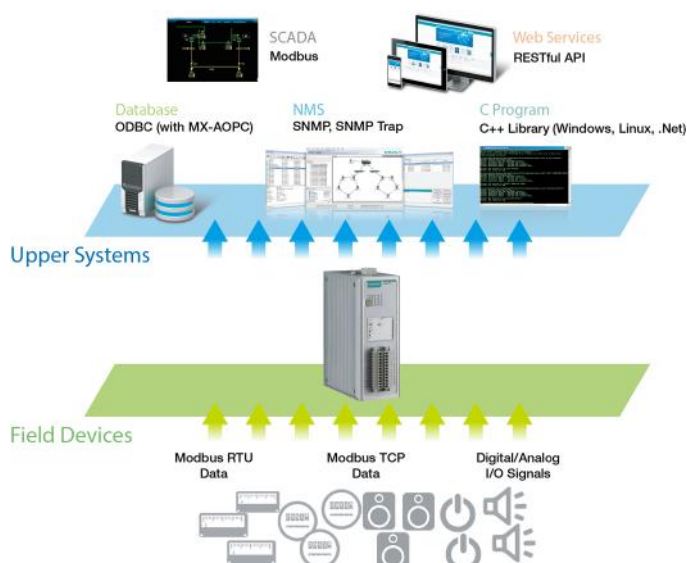

One of the Ethernet ports can be used to link to 8 daisy-chained ioLogik E1200 expansion modules to provide more than 100 channels. The ioLogik 2500 acts as the "head" unit, with Click&Go Plus logic used to control the entire I/O array. Most importantly, a single IP is all that is required to connect the entire I/O array to your network, providing the perfect solution for industrial field sites that have an insufficient number of IP addresses.

Programming-Free Click&Go Plus™ Logic

Click&Go Plus™ control logic supports up to 48 rules and 8 conditions/actions. In addition, its graphical user interface provides 3 logic gates and 3 multi-layers, helping you build more powerful and efficient IO solutions. Once you finish setting up your Click&Go Plus™ logic rules, IOxpress's easy-to-use simulation function can be used to find potential errors in your Click&Go Plus™ rules before uploading them to your online devices.

Multi-Protocol Data Concentrator

By supporting multiple protocols, the ioLogik 2500 improves the efficiency of collecting field-site data and then sending it to upper-level systems. For field-site data collection, an ioLogik 2500 can collect data from other third-party devices via both Modbus TCP and Modbus RTU, and also lets you link up to 8 ioLogik E1200 modules to create a versatile I/O array with over 100 different I/O channels, allowing all field-site data to be accessed by upper-level systems. For the upper-level systems, the ioLogik 2500 supports Modbus TCP, SNMP, SNMP Trap, RESTful API, Active OPC tag, and C++ library for easy integration with various IT/OT systems, making the ioLogik 2500 the perfect data concentrator for connecting field sites to your network.

Data Completeness with Local Storage Data Logging

The ioLogik 2500 supports microSD cards, turning it into a powerful data logger for storing valuable data. Important data from field sites can be accessed remotely by different systems via an FTP, and the ioLogik's data completeness function enables real-time monitoring of data through MX-AOPC UA Suite when the network goes down unexpectedly.

Specifications

Memory

microSD Slot	Up to 32 GB (SD 2.0 compatible) Note: For units operating in extreme temperatures, industrial-grade, wide-temperature microSD cards are required.

Input/Output Interface

Digital Input Channels	ioLogik 2512/2512-T: 8
Configurable DIO Channels (by software)	ioLogik 2512/2512-T: 8 ioLogik 2542/2542-T: 12
Analog Input Channels	ioLogik 2542/2542-T: 4
Buttons	Reset button
Isolation	3k VDC or 2k Vrms

Digital Inputs

Connector	Screw-fastened Euroblock terminal
Sensor Type	Dry contact Wet contact (NPN or PNP)
I/O Mode	DI or event counter
Dry Contact	On: short to GND Off: open
Wet Contact (DI to COM)	On: 10 to 30 VDC Off: 0 to 3 VDC
Counter Frequency	2.5 kHz
Digital Filtering Time Interval	Software configurable
Points per COM	ioLogik 2512/2512-T: 8 channels ioLogik 2542/2542-T: 6 channels

Digital Outputs

Connector	Screw-fastened Euroblock terminal
I/O Type	Sink
I/O Mode	DO or pulse output
Current Rating	500 mA per channel
Pulse Output Frequency	5 kHz (max.)
DIO Output Leakage Current	< 1 mA @ 30 VDC
Over-Current Protection	1.5 A per channel @ 25°C

Over-Temperature Shutdown	175°C (typical), 150°C (min.)
Over-Voltage Protection	45 VDC (typical)
